Special instructions:

Solutions are in the same language as the clue.

Clues marked with an asterisk consist of wordplay only: answers, which are thematic, and one of which is half-baked, must be entered in cryptic form, as a single word.

The solver must collect all the XVI's in the grid, enter their sum in the central cell and then complete the central row.

Chambers and Larousse are the primary references. One answer is an abbreviation.

Across

- 1 Albert's fun nearly spoiled by ape, what a story! (9,6)
- 12 Hermione's dog has tip of rectum touching six balls (5)
